wifi connectivity issue

2019/08/27

I have two windows 10 PCs - laptop and All-In-One HP23-r110. Both connected to the same home wireless network through the same modem. But while laptop does not have internet issues, the All-In-One cannot get any website - when trying to connect to any website it says that "there is no internet connection" (but laptop is connected to the same modem and working). Any suggestions?

free signal jammer for cell phones
